## Expanding Business

## CABLING DESIGN AND INSTALLATION FOR EXPANDING CRUISE BUSINESS

CIS SUPPORTS COMPANY'S CURRENT CABLING NEEDS

PROVIDES FRAMEWORK AND INFRASTRUCTURE FOR FUTURE  
GROWTH

### **OVERVIEW:**

A national cruise business purchased a duplex space in the Reno/Tahoe area, with intentions of using one half of the space initially for their start-up office. The client had plans to expand into the second half of the space as the business continued to grow.

CIS was approached to design and install cabling for the company in such a way that would meet their cabling needs while support their future expansion.

### **SERVICES PROVIDED:**

- Installation of 34 Cat 5E cables with terminations to patch panels and jacks
- Provide 17 face plates on 2 patch panels with 48 ports
- Test of continuity, opens, and shorts
- In-floor cabling for conference room

### **OUTCOME:**

CIS installed cabling to the planned occupied space to be customer ready. Lengths of cable were run to the unoccupied area to be ready to drop when customer was ready to expand.
